CONFIGURATION

MAIN UNIT

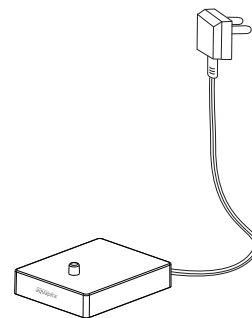

JET TIP (2pcs)

Purchasable Separately
1SET(2pcs/set)

CHARGER

GETTING STARTED

Notes:

There might be some liquid remaining inside the main appliance before use (tank, water suction tube, etc), this is the remaining distilled water that was used for the performance (water flow) test, so there are no health concerns.

Charging the device (Fig. 1)

- 1 Insert the adaptor plug into the power outlet.
- 2 Put the device up onto right place of the charger base.
- 3 The charge indicator blinks when the device is charging, and it will be steadily on after the device is full charged .
- 4 If the charge indicator is blinking during or after an irrigating, that means the battery need to be recharged.
- 5 It takes about 24 hours to fully charge it.

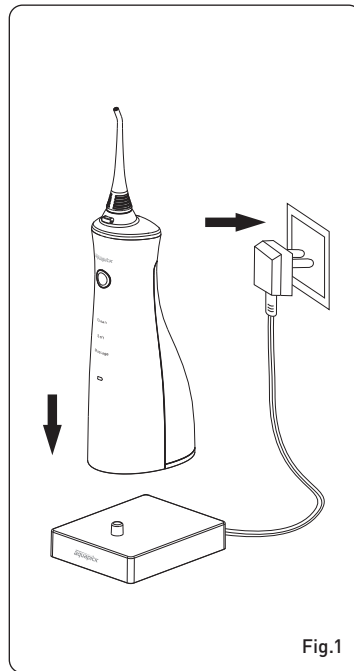

Fig.1

Notes:

- 1 When the product is fully charged and placed on the charging stand for a long time, there is power consumption because the LOGO indicator and the battery indicator are always on. When the battery power is below 96%, the product is recharged automatically, and the charge indicator flashes again to ensure the product's battery life and energy efficiency requirements. When the battery is fully charged, the charge indicator is always on.
- 2 When the product is fully charged and removed from the charger and placed back on top of the charging stand without use, the charge indicator flashes again as it is recharged automatically to ensure the product's battery life and energy efficiency requirements. When charging is complete, the charge indicator is always on.

HOW TO USE

Use the oral irrigator

- 1 Attach the jet tip onto the unit. (Fig. 1)
- 2 Open the water tank cap to fill the tank with water whose temperature does not exceed 40°C, and then close the cap. (Fig. 2)
- 3 Or slide the water tank down off the unit, fill the tank with water whose temperature does not exceed 40°C, and then attach the tank onto the unit. (Fig. 3)
- 4 Press the Power/Mode key to turn on the oral irrigator. It starts working at Clean mode. During irrigating, if Power/ Mode key is pressed, it will work next mode and the mode indicator will light up.(Fig. 4)
 - a. Clean: for normal cleaning.
 - b. Soft: for gentle cleaning of sensitive gums.
 - c. Massage: for cleaning and massaging the gums.

After pressing the Power/Mode button at first, if the button is pressed within 5 seconds again, its mode is changed and if the button is pressed after 5 seconds, the power is turned off.
- 5 Hold the unit in an upright position with the jet tip point toward your teeth.
- 6 Keep your mouth opened slightly so that the water can flow out.
